

This lab session covers Django Contrib Package (admin, sessions and messages). By the end of this session, students should have a very good understanding of how to use these packages.

Pre-lab Preparation:

1. Pages of the previous lab.
2. Add the necessary contrib packages in settings.py

Lab Activities:

```
PS C:\Users\shahd\OneDrive\حسابي\اداري\اداري\libraryproject> python manage.py createsuperuser
Username (leave blank to use 'shahd'):
Email address: shahd1791@gmail.com
Password:
Password (again):
Superuser created successfully.
```

Task 1: Create a register page with a URL '/users/register' with any necessary HTML files and view functions.

```
from django.contrib.auth.models import User

class RecoverForm(forms.Form):
    email = forms.EmailField()

class SignUpForm(forms.ModelForm):
    class Meta:
        model = User
        fields = ['username', 'email', 'password']

    username = forms.CharField()
    email = forms.EmailField()
    password = forms.CharField(widget=forms.PasswordInput())

    def save(self, commit=True):
        user = super().save(commit=False)
        user.set_password(self.cleaned_data["password"])
        if commit:
            user.save()
        return user
```

```

121
122 def registerUser(request):
123     if request.method == "POST":
124         form = SignUpForm(request.POST)
125         if form.is_valid():
126             form.save()
127             messages.success(request, "You have successfully registered.")
128             return redirect('login')
129         else:
130             form = SignUpForm()
131     return render(request, "usermodule/register.html", {"form": form})
132
133 def logoutUser(request):
134     logout(request)
135     return redirect('task7')
136
137 def loginUser(request):
138     if request.method == "POST":
139         form = AuthenticationForm(data=request.POST)
140         if form.is_valid():
141             user = form.get_user()
142             login(request, user)
143             messages.success(request, "Login successful.")
144             return redirect('student_list')
145         else:
146             messages.error(request, "Invalid credentials.")
147     else:
148         form = AuthenticationForm()
149     return render(request, "usermodule/login.html", {"form": form})
150
151

```

```

19 path('login/', views.loginUser, name="login"),
20 path('register/', views.registerUser, name="register"),
21 path("logout/", views.logoutUser, name="logout"),
22
23
24 ]
25
26
27

```

```

1 {% extends "layouts/baseuser.html" %}
2
3 {% block content %}
4 <form method="post">
5     {% csrf_token %}
6     {{ form.as_p }}
7     <button type="submit">Register</button>
8 </form>
9 {% endblock %}

```

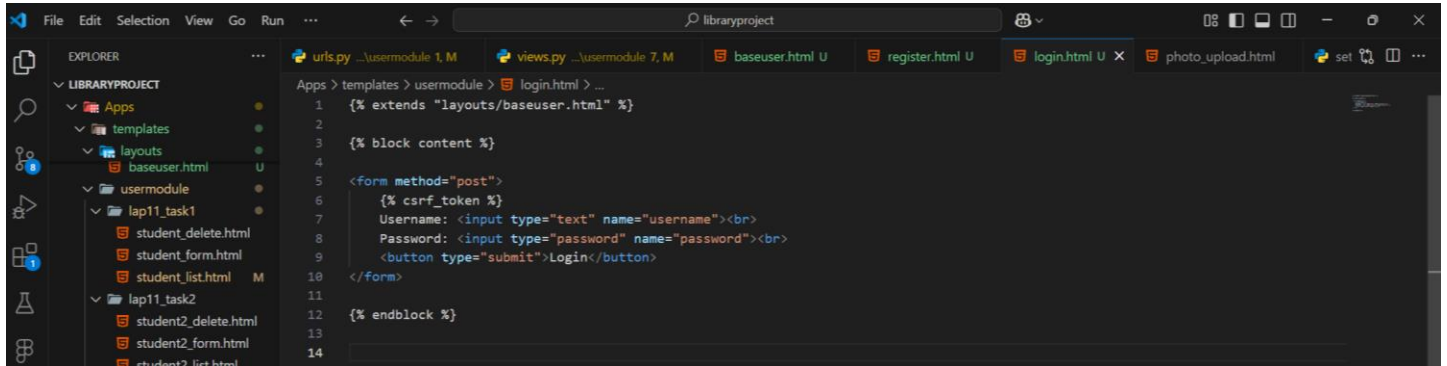

127.0.0.1:8000/user/register/

Username:

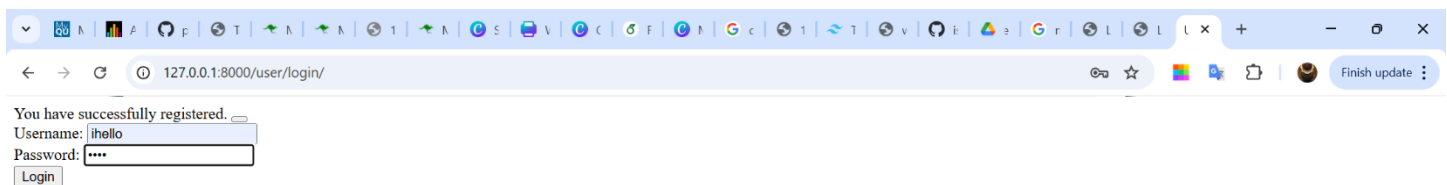

Email:

Password:

Task 2: Create a login page with a URL '/users/login/' with any necessary HTML files and view functions.

```
App's > templates > usermodule > login.html > ...
1 {% extends "layouts/baseuser.html" %}
2
3 {% block content %}
4
5 <form method="post">
6     {% csrf_token %}
7     Username: <input type="text" name="username"><br>
8     Password: <input type="password" name="password"><br>
9     <button type="submit">Login</button>
10 </form>
11
12 {% endblock %}
13
14
```

127.0.0.1:8000/user/login/

You have successfully registered. ☐

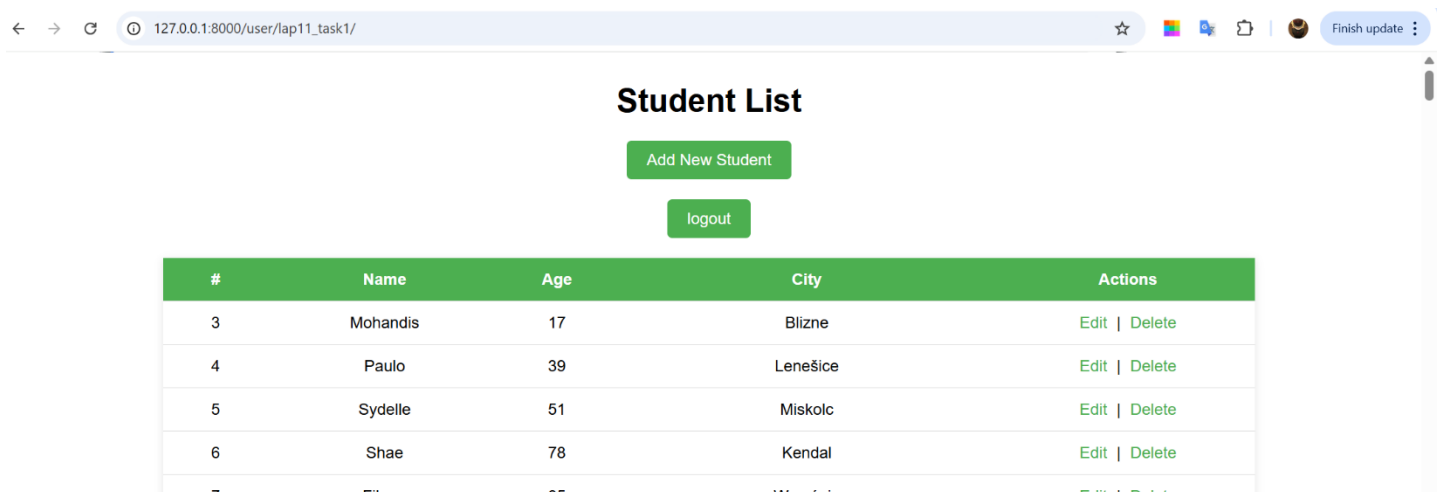

Username:

Password:

Task 3: Apply login permission to the previous lab. If the user is not logged in, redirect the user to the login page.

```
from django.contrib.auth.decorators import login_required

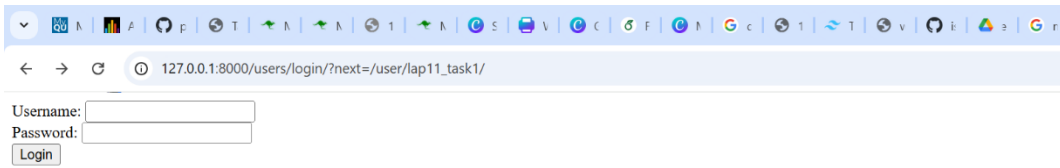

@login_required(login_url='/users/login/')
def lap11_task1_student_list(request):
    students = student.objects.all()
    return render(request, 'usermodule/lap11_task1/student_list.html', {'students': students})
```

127.0.0.1:8000/user/lap11_task1/

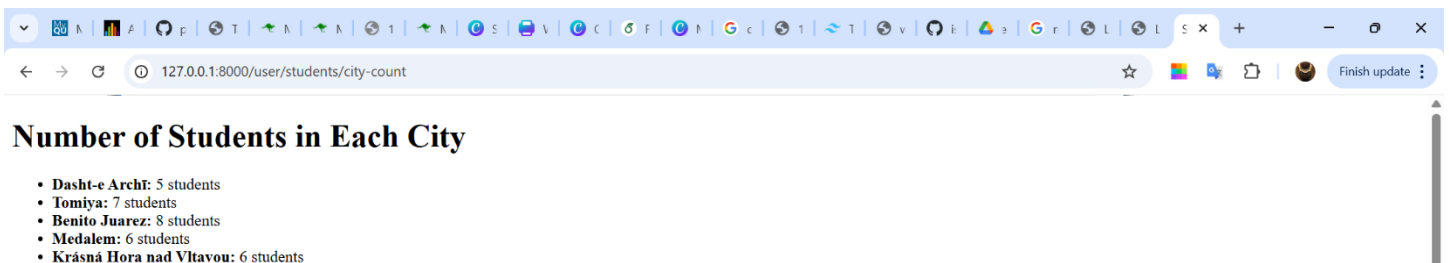

Student List

#	Name	Age	City	Actions
3	Mohandis	17	Blizne	Edit Delete
4	Paulo	39	Lenešice	Edit Delete
5	Sydelle	51	Miskolc	Edit Delete
6	Shae	78	Kendal	Edit Delete
7	Filmer	85	Września	Edit Delete

Task 4: Add a link '/users/logout' to sign out users to all pages where the user is logged in.

After logout will go to this page

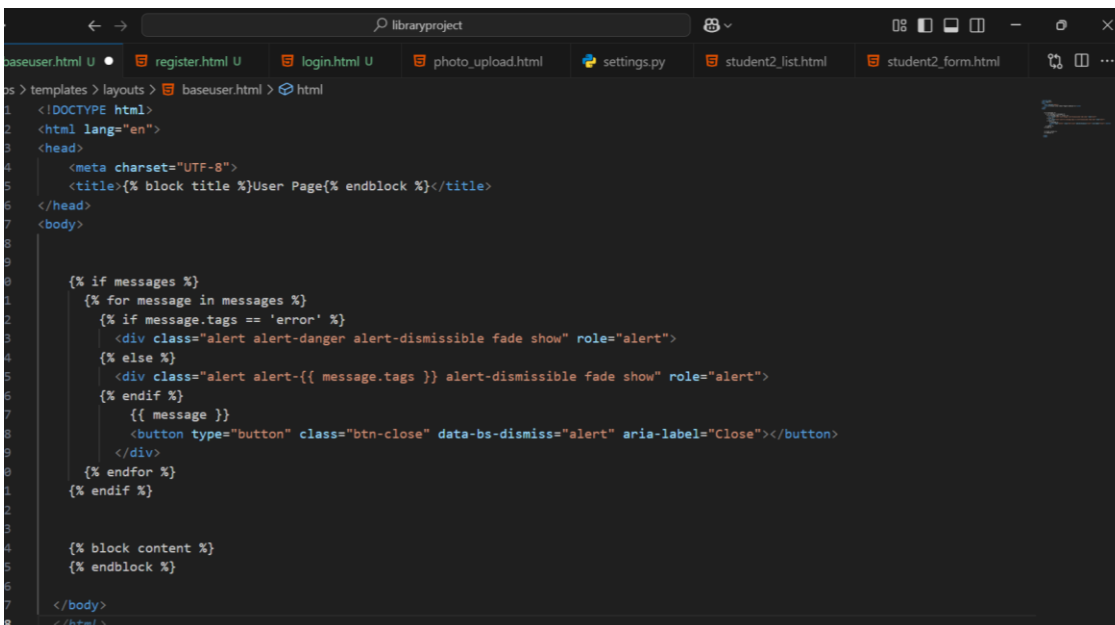

Number of Students in Each City

- **Dasht-e Archi:** 5 students
- **Tomiya:** 7 students
- **Benito Juarez:** 8 students
- **Medalem:** 6 students
- **Krásná Hora nad Vltavou:** 6 students

Task 5: Provide messages to users, like, 'you have successfully registered', 'login successfully', or 'error message.'

In the base

```
baseuser.html U • register.html U login.html U photo_upload.html settings.py student2_list.html student2_form.html
bs > templates > layouts > baseuser.html > html
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4 <meta charset="UTF-8">
5 <title>{% block title %}User Page{% endblock %}</title>
6 </head>
7 <body>
8
9
10 {% if messages %}
11     {% for message in messages %}
12         {% if message.tags == 'error' %}
13             <div class="alert alert-danger alert-dismissible fade show" role="alert">
14                 {{ message }}
15             </div>
16         {% else %}
17             <div class="alert alert-{{ message.tags }} alert-dismissible fade show" role="alert">
18                 {{ message }}
19             </div>
20         <button type="button" class="btn-close" data-bs-dismiss="alert" aria-label="Close"></button>
21     {% endfor %}
22 {% endif %}
23
24 {% block content %}
25 {% endblock %}
26
27 </body>
28 </html>
```
